## Languages

Spanish — NATIVE/BILINGUAL

English — FLUENT

## Introduction

I am a Software Engineer specialized in full-stack web development, with professional experience developing and maintaining web applications and RESTful APIs. My experience is mainly focused on the .NET and Angular ecosystems, with additional experience working with technologies such as Java, SQL and other web development technologies.

I have a strong foundation in software design and architecture, including Domain-Driven Design (DDD), Hexagonal Architecture, CQRS and Model-View-Controller (MVC), applying these principles to build scalable, maintainable and high-quality solutions.

I am experienced in working within collaborative teams, contributing to project planning, development and delivery, while actively collaborating with others to solve problems and improve existing solutions. I am also comfortable working in English and communicating effectively in professional environments.

Alongside my professional experience, I have been actively involved in the tech community through Aula de Software Libre, contributing to the organization of workshops, events and SalmorejoTech, a technology conference focused on knowledge sharing within the IT sector.

I am a proactive and adaptable developer with a strong focus on continuous learning, software quality and applying good development practices to build robust and maintainable solutions.

## My skills

- Attention to detail
- Continuous learning
- Proactivity

## My best practices

Some of the best practices I've worked with or I'm familiar with are:

- Domain Driven Design (DDD)
- Hexagonal Architecture
- Event Storming
- CQRS
- Model-View-Controller (MVC)

## Technologies and tools

### I MASTER

AJAX / Angular2+ / API / ASP.net / Bootstrap / C / C# / C++ / Claude Code / CSS / Docker / Git / Gitflow / Github / GitLab / HTML / IIS / Java / JavaScript / jQuery / JSON / Linux / MongoDB / MySQL / .NET / .Net Core / .NET Entity Framework Core / NHibernate / Oracle / PHP / PL/SQL / Postman / SoapUI / SQL / SQLServer / Symfony / Tailwind / Twig / TypeScript / XML

# PROFESSIONAL EXPERIENCE/CAREER

## ICCA

### Full Stack Developer

**Nov 2024 — TODAY** (2 yrs.)

At ICCA, I work on the development and maintenance of web applications using technologies such as .NET, Angular, Java and SQL. I have participated in different projects for clients including the Madrid Transport Consortium, the public transport services of Valencia and Zaragoza, and the supermarket chain Consum. My responsibilities include both front-end and back-end development, implementing new features and improving existing systems. I also work with REST and SOAP APIs, participate in database management tasks using PostgreSQL, MySQL and SQL Server, and collaborate with the team through Git, GitFlow and Agile-based workflows.

**TECHNOLOGIES AND TOOLS**

Java / Angular2+ / HTML / CSS / C# / .NET / PostgreSQL / MySQL / Bootstrap / SQL / API / Git / Microsoft / SOAP / REST / .Net Core / Postman / GitLab / Tailwind / SQLServer / Visual Studio / SoapUI / Microsoft Excel / JSON / Visual Studio Code / Gitflow / IIS / .NET Entity Framework Core / NHibernate

---

## Nfq Advisory, Solutions, Outsourcing

### Backend Developer (Associate)

**Sep 2024 — Nov 2024** (3 months)

At Nfoque Advisory Services, I worked on software development and data management tasks for the client BBVA using technologies such as Java, SQL and MongoDB. I also worked with XML and JSON data structures in enterprise environments, collaborating in maintenance and improvement tasks for internal applications and databases.

**TECHNOLOGIES AND TOOLS**

Java / MongoDB / SQL / XML / Oracle / JSON

---

## Eurotransportcar Servicios Logísticos del Automóvil

### Full Stack Developer Intern

**Oct 2023 — Apr 2024** (7 months)

During my internship at Eurotransportcar, I participated in the development and maintenance of web applications using PHP, Symfony, JavaScript and MySQL. I implemented front-end functionalities with HTML, CSS, Bootstrap and jQuery, and worked with APIs and AJAX requests to improve application functionality and user experience. I also collaborated with the team using Git and GitFlow methodologies.

**TECHNOLOGIES AND TOOLS**

PHP / Symfony / JavaScript / HTML / CSS / MySQL / Bootstrap / Docker / jQuery / API / Github / AJAX / Twig / Gitflow

# EDUCATION/DEGREES

## Degrees

### Universidad de Córdoba

— Computer Engineering

**Sep 2019 — Sep 2024** (5 yrs. and 1 month)

Computer Engineering with Software mention in Universidad de Córdoba

**TECHNOLOGIES AND TOOLS**

Java / JavaScript / HTML / CSS / C / C++ / SQL / Bash

## Certificates

### B1

Issued by: Cambridge University

**Oct 2016 — TODAY** (10 yrs. and 1 month)

### BUT WAIT...
### THERE'S EVEN MORE IN MY PROFILE.

This is a short version of my profile, but a longer one is available where you can see more interesting and relevant data.
